

Discarded Food Hierarchy:

Make sure communities do not impose/mandate curbside organic collection only.

- 1) Reuse/Educate
- 2) Share
- 3) Reduce/Don't over buy
- 4) Home Compost
- 5) Drop off at local Resource Recovery Centres
- 6) Add to PAYT (Pay As You Throw) pick up programs.

After all these things have been "properly" implemented, then and only then implement curbside collection for the rest.

Food discards turned into earth locally, to grow more food locally, home composting first, is far superior to tossing food scraps into wheely carts, to be trucked over great distances to some costly mega facility.

FOOD SCRAPS
